eCourse in One Health Approach for Pandemic Preparedness (OHAPP)

This course is offered by PHFI Centre for eLearning

Course offered by

COHERD®
Centre for One Health Education, Research & Development
A joint initiative of IIPHG, India & IHPH, Germany

"Global Partnerships for Local Impact: Bridging Learning and Practice"

Background

eCourse in One Health Approach for Pandemic Prevention (OHAPP) is a three-month eLearning program designed to cover basic concepts of One Health, and its various implications for the pandemic prevention. The course has been developed by the Centre for One Health Education, Research and Development (COHERD), Indian Institute of Public Health Gandhinagar (IIPHG). COHERD is a designated centre for excellence striving to work on interdisciplinary topics of One Health. Within the broad field of One Health, the key focus of the centre is on zoonotic diseases, antimicrobial resistance, health system strengthening, disease surveillance, and biosecurity in South and East Asia.

This ecourse will be hosted at IIPHG, India, in partnership with the Institute for Hygiene and Public Health (IHPH), Bonn. This course will be delivered by a multi-disciplinary team from IIPHG and One Health experts.

Aim and Purpose

IIPHG, with its well-established One Health Centre (COHERD) is in the best position to offer a program on One Health. This course aims to sensitize researchers, professionals, and students from the various sectors on the One Health approach and its implications as part of the pandemic preparedness. These will help them implicate the One Health approach in real-life scenarios, ultimately adding to the efforts to effectively control and prevent emerging and re-emerging zoonotic diseases. This will also help them in taking the initiatives on intersectoral collaboration as part of pandemic preparedness. It will help participants to:

- To create an understanding of the One Health concept and it's history among the participants.
- To explain One Health's role in preventing and preparing for a pandemic of emerging and re-emerging infectious diseases.
- To explain risk factors at the human-animal-environment interface for emerging and re-emerging infectious diseases.
- To understand the various aspects of pandemic preparedness and Global Health security.
- To understand the concept of effective communication, leadership, intersectoral collaboration and teamwork
